Test/Method	Unit	Result	Specification
Mechanical dishwashing resistance of utensils 20 Washes - Performance test <i>NF EN 12875-1:2005-11 adapted (CH770)</i>			
Hardness (total)		0°th	
Number of specimen		5	
Washing temperature	°C	Washing 55°C and rinsing 65°C	
Observation		Very slight bend and deformation (The cup turns over and fills with water at each cycle)	
Resistance after 20 washes in the dishwasher		Satisfactory	

PICTURES:

The results and observations of this test report only concern the sample provided to the laboratory and tested. For tests not requiring sampling, the results only concern the sample such as received. Except specific case, the sample will be kept during the duration mentioned in the contract or by default in our terms and conditions from the date indicated on the present document. The sample and the information regarding the sample have been provided by the client. All information related to the sample are under liability of the client and have not been checked by the Eurofins company. This test report is not aimed to give an exhaustive conformity to regulations. It only refers to qualitative and quantitative criteria which allow declaring the compliance to specifications of the reference file when provided by the customer. The result (excluding microbiological analyses) is declared not compliant when, in spite of taking into account the measurement uncertainty at a 95 % trust level (if available), the value found cannot be included in the specification interval and/or be inferior to the regulatory limit. The copy of this report is only authorized by unabridged edition. Any publication of this report must be authorised by Eurofins.
